

How To Flatten Your Stomach Without Surgery

Alma Accent Laser is the most high-tech way to reduce those "love handles."

Jan. 31, 2009 - [PRLog](#) -- Now there is a way to tighten your tummy, melt fat and shrink your stomach with no invasive surgery, no downtime and no pain! The Alma Accent Laser is the most high-tech way available to help you get a sexier body and more youthful face. Patients actually report losing inches and dropping sizes after being treated with Alma Accent.

Accent XL Thermotherapy is a non-invasive technology that uses radio waves in a controlled fashion to apply heat therapy (thermotherapy) that tightens the skin on the face and body. The treatment is comfortable, quick, and pain free (it feels like a warm to hot massage). Accent XL helps tighten and firm any loose, wrinkled or dimpled skin anywhere on the body. Accent XL is used to tighten skin on the face, jowls, neck, and upper arms. It is effective in treating the thighs, buttocks, and abdomen. It works well on postnatal and post-surgical abdomens as well.
