

## New HD Digital Signage Player

By TiroMedia

Dated: Jan 31, 2009

*TiroMedia announces the release of a new Full HD wireless digital signage player: The TMP N4*

Announcing The TMP N4!

TiroMedia is pleased to announce the introduction of a new HD Network Player: The TMP N4. The new player features an HDMI interface as well VGA. It supports resolutions up to 1080p. It has built-in wireless (802.11b/g) in addition to wired Ethernet. This allows for great flexibility in deployment.

At 6.8" x 4", the TMP N4 (<http://www.tiromedia.com/tmpn4.aspx>) is one of the smallest HD digital signage players available on the market. The player uses very little power compared to a PC. This results in considerable savings in energy costs, especially in environments requiring 24/7 operation.

Like all players available from TiroMedia, the TMP N4 is 100% solid-state and has no moving parts. All content is stored on a local CF card. The new player is fully compatible with TiroMedia's web-based CMS. The CMS is available free of charge with the purchase of a network player. More information about the CMS is available here: <http://www.tiromedia.com/cms.aspx>

The TMP N4 is priced at: \$799.99. Volume discounts are available.

More information is available on: <http://www.tiromedia.com>

Best Regards,
