

## **The MACK Group Announces 2008 to be a Year of Non-Recordable Incidents and Continued EMR below 1**

*By Steve King*

*Dated: Feb 01, 2009*

*The MACK Group is proud to announce that the 2008 year was a year of non-recordable OSHA incidents. Due to this impressive safety record, The Mack Group has been able to maintain an EMR rating of below 1.0.*

The MACK Group is proud to announce that the 2008 year was a year of non-recordable OSHA incidents. Due to this impressive safety record, The Mack Group has been able to maintain an EMR rating of below 1.0. This safety record was accomplished through the dedication to safety and teamwork of our employees, subcontractors and clients.

During 2008, The MACK Group performed all work without an OSHA recordable incident / accident. This work was performed on asbestos, mold and lead abatement and removal, industrial and pharmaceutical duct cleaning and biological and chemical remediation, and all types of concrete surface preparation and floor covering removal (shot blasting, terminator sales, etc.) projects. Each project was overseen by a site safety officer and staffed by a site supervisor who enforced The MACK Group's corporate Health and Safety Plan as well as client specific safety standards and, of course, all OSHA, EPA and ANSI standards.

The MACK Group prioritizes safety on each and every project as well as throughout the organization. Everyone, from the owner's of the company to the laborers as well as any subcontractors, is actively involved in The MACK Group's commitment to an incident-free workplace.

This safety record has been made possible through The MACK Group's commitment to educating and training employees (40 Hour Haz WOPWER, 10 & 30 OSHA Construction Training, etc.), providing the latest technology in tools and equipment and our employees dedication to implementing proper safety procedures and immediately correcting any potential hazards. The MACK Group is dedicated to continuing this exceptional safety record through 2009 and beyond.

### About The Mack Group, LLC

The Mack Group, LLC is an expert, licensed contractor providing a wide range of services from asbestos removal and abatement to decontamination nationwide.
