Grapefruit Seed Extract

Grapefruit seed extract is a natural antibiotic used for many different types of skin ailments. It is a powerful ingredient to aid in the healing of skin damage. Grapefruit seed extract helps to restore damaged collagen and elastin, which strengthens and retextures the skin.

As collagen and elastin are responsible for the skin's elasticity, improving and stimulating production of the connective tissue cells will prevent skin from tearing and thus prevent the formation of stretch marks. The condition of the skin's connective tissue also dictates how well the skin contracts after pregnancy. So not only does this compound improve the condition of your stretching skin, after the delivery it will also aid in the contraction of your skin to its previous appearance.
