Press Release

New Computer Software/Hardware breakthrough.

A.V.C. announces a new AntiVirus product that offers users three simple choices which will make it impossible for computer users to acquire Viruses, Worms, Spyware or Ad-Ware or any corruption to their computer.

The three choices are,

1. SAVE ALL CHANGES
2. REMOVE ALL MISTAKES
3. CHANGE PASSWORD

Unlike AntiVirus software, A.V.C. never allows Viruses, Worms, Spyware or Ad-Ware to touch the hard drive. Since nothing can attack the hard drive it makes it impossible for the computer to be corrupted. The new A.V.C. product is available now and can save computer users worldwide hundreds of dollars in computer repairs.

For an example one of the most expensive computer repairs is to reinstall the Windows Operating System, removing Viruses and backing up files. Some computer repair companies will charge hundreds of dollars for these repairs. Business owners have experienced many hours of down time, lost of sales, and employee inefficiencies. By using the A.V.C. product these problems can all be avoided. Employees or family members cannot make any unnecessary changes to their computers without an administrator that has the secured password. Using as directed A.V.C. makes it impossible to corrupt or sabotage the computer. A.V.C. can be installed very easily by the user or by national companies like Staples, etc. which generally charge approx \$30.00 to do a software installation. Although A.V.C. was created to assist consumers, large and small businesses, It is also very user friendly and great for first time computer users and children. A.V.C. has a modest retail price of \$89.95, a free 24/7 customer service support.

###

A.V.C. is a Five year old growing Company. The all new A.V.C. product has taken years to develop and this is our first press release.
