

## **Advanced Hair Studio - For natural appearance, it's perfect!**

*By Advanced Hair Studio PR*

*Dated: Mar 23, 2009*

*Advanced Hair Studio is successful, both in the UK and Europe, as well as around the world. We continue to develop world leading products and services and continue to sell our products to a wide range of men and ladies.*

On the male product side, we have improved our VR range and can now offer Virgin European hair at very affordable prices. Make sure you discuss the VR range with your local Manager. Our hair development programme runs 365 days a year and we are constantly evaluating and developing new hair loss products and accessories to ensure that you look your best when using our products.

Our expansion in the UK and Europe continues with Studios opening in Belfast and in Surrey. This programme represents a very sound business opportunity.

Advanced Hair Studios' Virtual Reality has been enormously successful worldwide because of the way the hair performs in a totally natural way in all circumstances. This is because the hair is individually implanted into a skin like membrane which is an ultra thin, natural looking scalp like matrix - and it's virtually impossible to differentiate from hair growing directly out of your scalp. Combined with European Hair, Virtual Reality offers the closest possible option of perfect hair replacement. Now

The best HAIR is now at a very affordable price. Now Advanced Hair Studio can offer the best hair at a price that is affordable by all! For the first time anywhere in the world, Advanced Hair Studio have developed technology that combines European Hair (hair that has not been decuticalized/stripped) with the Virtual Reality program. But most importantly, because we have bulk purchased Virgin European Hair, we can now offer this unique program at a very affordable price. So ask your consultant now how you can benefit from our limited launch special offer.

Everyone can afford the most undetectable hair in the world!

The ladies product is sold through all our UK Studios as well as exclusively through our Studio in Knightsbridge, West London.

We are proud to launch the AHS Female Web Site which went live recently!

Visit <http://www.advancedhairstudio.com>. The new addition to the web site is designed to let women know about the Hair Care options available to them at our Studios.

So please pass this on to your friends or partners and see if they too can benefit from a visit to AHS.
