

## Financing Solar Projects - Silicon Solar Launches Solar Finance Company

By Silicon Solar Inc

Dated: Mar 23, 2009

*Silicon Solar Financial will work directly with Silicon Solar, Intelligent Green Solutions and Certified Solar Installers across the United States and around the world on financing solar projects both large and small.*

Silicon Solar Inc, a world-wide leader in the solar energy industry, founded by Adam Farrell, a Cornell University Graduate, recently launched Silicon Solar Financial, a solar finance company dedicated to financing solar projects across the United States and around the world. Financing solar projects has become a major industry these days - with the recent boom, and expected future growth of solar energy, financing solar projects is a huge market need that will be required to be met in the coming years, and into the future.

The fastest growing segment of the solar energy industry in the United States is commercial solar power. Of course, these larger commercial solar power systems can be expensive to purchase and install. This makes financing solar projects, such as these large commercial solar power installations a major requirement for any company in the solar industry.

Silicon Solar Financial will work directly with Silicon Solar, Intelligent Green Solutions and Certified Solar Installers across the United States and around the world on financing solar projects both large and small. Adam Farrell, CEO of Silicon Solar Inc, and the brainchild behind Silicon Solar Financial, is excited about the opportunities that a company like Silicon Solar Financial provides to the solar industry - "the option of financing solar projects, and extending lines of credit to our authorized dealers and installers makes operating a solar finance company like Silicon Solar Financial an incredible asset and advantage to us, to our partners, and to our dealers."

Adam Farrell says, "financing solar projects and financing renewable energy is incredibly important, and providing solar finance services is a great way to support the thousands of home and business owners across the United States who want to go solar achieve the dream of energy independence in the most-affordable and risk-free manner. Aside from financing solar projects, Silicon Solar Financial will also work with power purchase agreements and renewable energy credits in order to provide one-stop-shop for all of your renewable energy and solar finance needs."
