Open discussion of RedDot related topics

- "What's going on in the RedDot Usergroup?"

Review of the year 2008, further development of the community in 2009 and the Usergroup executive committees' reaction on the changes with OpenText. Review of the year 2008, further development of the community in 2009 and the Usergroup executive committees' reaction on the changes with OpenText.

Dirk Langenheim, executive committee RedDot Usergroup association and Intentive GmbH

- "Enhancing Web Publishing with Digital Asset Management" - Using Open Text Artesia DAM to enhance your Open Text WCMS (Red Dot) web sites

Open Text has recently announced the Artesia DAM bridge which enables the WCMS (Red Dot) product to use Artesia Digital Asset Management as a source for rich media for publishing. This presentation introduces Artesia Digital Asset Management to Open Text WCMS users and includes a simple demonstration of the power of this integration. Some customer examples and product roadmap are also discussed.

Richard Butlin, Open Text Digital Media Group

###

The RedDot Usergroup e.V. is a community of specialists, users and service providers which all use products by RedDot Solutions AG. RedDot Solutions Corporation, an Open Text company, is a provider for Web- and Enterprise Content Management solutions.

RedDot partners as well as end users have gotten together for an intensive exchange of their experiences in order to quickly extend their individual know-how. Thus, a more efficient application of RedDot software in individual user scenarios for single problem solution is carried on faster.

The RedDot Usergroup association is holding regular user conferences and workshops. Members of RDUG receive discounted rates for attending these events.
