

Ats Announces First Annual Spring Promotion!

By Adv-Tec Systems, Inc.

Dated: Apr 16, 2009

Adv-Tec Systems, Inc. has recently announced that all ATS 3000 Modules purchased through May 31'st, 2009 will be priced at distributor's discount.

Concerns about the economy prompts this unprecedented promotion. Vice President Gary Shockley stated, "With banks tightening up on lending it's a little harder to get funding for new car wash equipment. We believe this promotion, a savings of up to 30%, will help ease the initial burden of building a new, or re-habbing an existing wash." He went on to say that similar savings are being passed on to distributors in order to maintain promotional pricing overall.

In this down economy, more people are hanging onto their cars longer. As this trend continues, the need for safe, economical self-service and drive-through mini-tunnel washes will increase. Their car's appearance is important to people. More importantly, keeping their cars free of dirt and residue will keep the car looking great longer and reduce corrosion. Mr. Shockley said. "It's simple. People generally love their cars and will keep taking them to the car wash as long as they have a few extra quarters spend."

The ATS 3000 Module is the corporation's mid-priced self service car wash system. Featuring from 3 to 9 bays, it is micro processor controlled, stainless steel where it counts, and equipment room ready. Attach it to existing utilities and meter boxes and the ATS 3000 can be washing cars in a few days. The standard features and easy installation along with the Spring Promotion discount combine to reduce overall equipment and labor costs.

Gary Shockley is the co-founder of Adv-Tec Systems, Inc. Starting out in the car wash industry in 1989 his field experience is unparalleled. Gary has been designing self-service car wash equipment since 1995. His amazing ability to diagnose and troubleshoot over the phone has earned him the title: Car Wash Guru.
