ON SALE - The compact DSC PowerSeries 9047 Wireless Alarm Kit - An Installer's Dream

Enjoy the benefits of the KIT447-1CP01 - DSC Power Series 9047. It is packed with features including two-way communication. The PowerSeries 9047 is easy to use and install. Say goodbye to those bothersome holes in the wall!

April 17, 2009 - *PRLog* -- Do you think installing a wireless alarm system all by yourself is complicated? Well it does not have to be, especially with the KIT447-1CP01 - DSC Power Series 9047 Wireless Alarm Kit. It's a full-featured home security system that installs in minutes and eliminates the clutter and expense of pulling wire to host various sensors, detectors, and other accessories. What's even better – it's on sale right now at Home Security Store!

The PowerSeries 9047 will bring you years of protection and security and it's not boring when it comes to its sleek look either. The control panel incorporates visual appeal with bold, contoured lines and enlarged keypad buttons that are easy to read and use. Add to that, a full message LCD display which can be programmed to display which room has had an intrusion.

The PowerSeries 9047 alarm kit comes with a self contained wireless residential control unit that acts as the control panel, keypad, and siren. The kit also includes a transformer, a PIR motion detector, 2 wireless door/window transmitters, a wireless key fob, and a telephone jack module.

This system is packed with features including 2-way hands free or push-to-talk communication with the monitoring station during alarm events. This communication is possible through high-quality speakers and microphones. The 9047 also features up to 32 wireless security zones and accommodates up to 16 wireless keys. It has 17 user codes,
128 event buffer, 1 partition, and the siren packs a punch with 85 dB.

There are 5 programmable function keys (Stay Arm, Away Arm, Chime, Bypass and Quick Exit), plus easy access emergency keys (Fire, Auxiliary or Medical, and Panic).

The system can integrate all DSC wireless devices such as additional key fobs, sensors, or motion, smoke, and carbon monoxide detectors. Enrolling such devices is a cinch. That's because it's a very easy wireless device enrollment process.

Technicians say the simplified enrollment process of the PowerSeries 9047 greatly reduces overall installation time. You no longer need to manually program serial numbers or other system information. Instead, a series of enrollment screens prompt installers to confirm electronic serial numbers (ESN), zone numbers, and zone type.
