

How to Backup iPod Touch Files from iPod Touch to Computer

By *ipod-tool.com*

Dated: Apr 19, 2009

Transfer and backup iPod Touch music to computer without jailbreaking? Now this iPod Touch backup software makes it possible and easy. It offers a full solution to backup files on iPod Touch to PC and from iPod Touch to iTunes in seconds.

Backup iPod Touch has become a main concern recently. Many iPod Touch users may have come across this problem if they did not know how to **backup iPod Touch files**. Now this iPod Touch Backup software enables us to easily **backup iPod Touch files to pc**. Free download this **iPod Touch backup software** at <http://ipod-tool.com/ipod-software/backup-ipod-touch.html>

Take the following cases as example:

Case 1: just got iPod Touch music from a different computer, and then updated iPod Touch with the registered pc, only to find all iPod Touch music was erased and replaced with the music on the register pc.

Case 2: computer got formatted with iTunes erased. After reinstalling iTunes and plugged iPod Touch back to iTunes, only to find all iPod Touch files got deleted.

And there are much more such cases. That's because apple only allows one iPod Touch to sync with only one iTunes. Luckily, here is a full solution to **backup iPod Touch**. This **iPod Touch Backup software** enables us to transfer and backup all music, songs, videos, photos, playlists, podcasts and more from iPod Touch to computer and from iTouch to iTunes as long as all files are still on the iPod Touch.

It is an easy to use iPod Touch backup software designed to help you **backup iPod Touch files from your iTouch to computer**. Whether your computer crashed, broke, or was stolen - or if you simply bought a new computer, or want to share your iPod Touch content with a friend - This **iPod Touch backup software** :Aniosoft iBackup can always help.
