

Hifonics Olympus Subwoofer is Built for the Extreme

Hifonics Olympus Subwoofers are made for the audio enthusiast who is looking to push a system to the limit - up to 4800 MAXX!

April 24, 2009 - [PRLog](#) -- You know you have a serious line of Subwoofers when each unit weighs between 30 and 40 pounds, or about the same as an average 4 year old. The Hifonics Olympus Subwoofers are made for the audio enthusiast who is looking to push a system to the limit – up to 4800 MAXX!

The durable mechanical control can be attributed to a 1” high roll foam surround and the double-laminated integrated spider tinsel-lead design prevents “lead slap” when put under high excursion. The 3” dual 2-Ohm + 2-Ohm voice coils can configure for a 1-or 4-Ohm load or can be connected to two linked amplifiers. Large double-stacked magnets provide increased motor strength and the heavy die-cast aluminum chrome frame features chromed mesh venting and finned areas help dissipate the heat. The push and insert wire terminals make for easy wiring.

Beyond the enormous power, the Olympus Subwoofer is also known for its outstanding looks. Two versions are available in the two most commonly asked for sizes, 12” and 15”. The 1600 series boasts a 160 oz. high-energy magnet and for maxximum power, the 2400 series features an incredible 180 oz. high-energy magnet.

MODEL	SIZE	MAXX POWER	RMS POWER	DVC IMP/OHMS
OLM1612	12”	3200 WATTS	1600 WATTS	2 + 2
OLM1615	15”	3200 WATTS	1600 WATTS	2 + 2
OLM2412	12”	4800 WATTS	2400 WATTS	2 + 2

About Maxxsonics

Maxxsonics USA, Inc. is a leading manufacturer and distributor of quality car, marine, television and home audio products. Based in Lake Zurich, IL Maxxsonics offers a complete line of sound component systems with brands MB Quart, Hifonics, Crunch and Autotek.
