

## **triCerat to Present Simplify Suite v5 at Microsoft Management Summit 2009**

*By triCerat, Inc.*

*Dated: Apr 27, 2009*

*triCerat, Inc. will be demonstrating its new version of the popular Simplify Suite virtualization software package at the upcoming Microsoft Management Summit 2009.*

COLUMBIA, Md.—With one decade under its belt, the Microsoft Management Summit (MMS) 2009 promises to be more technically informative than ever, emphasizing this year's underlying topics with the theme, "Physical, Virtual, Powerful". In keeping with this principle, triCerat is excited to be offering tools that can help companies seamlessly migrate their system from the physical to virtual environment.

Visit the Venetian Hotel as Microsoft experts and industry leaders delve into over 140 technical sessions and more than 9,000 hands-on labs. Info sessions led by the Microsoft product teams and IT experts will provide solutions and advice based on their own unique experiences. The hands-on labs are both attendee and instructor-led, allowing users to follow and lead topics while experimenting with a plethora of products, solutions, and technologies. Not only will you get the chance to learn from peers and industry giants, networking opportunities abound and over 60 sponsors and exhibitors, including triCerat and such companies as HP, Novell, Citrix, and Dell, will showcase their wares in the MMS 2009 Expo.

### **Chat with triCerat and See the Simplify Suite v5 In Action**

Friendly and knowledgeable triCerat staff will be at booth #219 to answer any questions you may have and run demos throughout the day. Now in its Gold release, the Simplify Suite v5 extends support to Windows Server 2008 and workstations, expanding opportunities for new and existing customers alike. The new Simplify Suite provides even greater platform continuity, boosting system performance and stability. This robust, easy-to-use, complete desktop management system gives you the power to:

- eradicate printing problems
- control application access
- minimize logon and logoff times
- manage customization for large numbers of virtual desktops
- provide users a highly predictable desktop
- deliver correct profile information to the right end user and location at every session
- increase overall user productivity

Learn more about the Simplify Suite by visiting <http://www.tricerat.com>, then schedule a free demo or download a 30-Day Free Trial.

###

### **About triCerat**

Founded in 1997, triCerat develops software that simplifies and enhances the operation of server-based, workstation, and virtual computing environments. The company's flagship product, Simplify Suite, is a comprehensive package of integrated server management tools that can boost the manageability, reliability, performance, and security of any environment.

Licensed by over 8,000 customers worldwide, Simplify Suite creates significant ROI by reducing support

and hardware costs while increasing user satisfaction and productivity.
