

## **ATS Car Wash Adds New Going Green Storefront!**

*By ATS Car Wash*

*Dated: Apr 27, 2009*

*ATS Going Green feature's G-WASH™ the Heavy Duty Hydrophobic Car Wash by Green Earth Technologies (GET).*

G-WASH™ is a highly concentrated cleaner/degreaser. This powerful blend of American Grown base oils and nanotechnology is not a soap, detergent or petroleum solvent. Totally Green G-WASH™ is a hydrophobic solution which causes water to bead up and roll off cars leaving no spots behind.

ATS's V.P. Gary Shockley believe's that G-WASH™ is, "...a green alternative for detailers. It's safe, biodegradable, non-toxic and actually gets cars clean."

Getting cars clean with natural or "Green" products has been an issue for the car wash industry. Altruistic ideals aside, if it doesn't get a car clean wash owners and detailers wont use the product. It's a closed loop: -->Customer wants a clean car--> Products used at a wash or by a detailer aren't performing--> Unhappy customer--> Loss of revenue--> Wash owners and detailers stop using product!

That's why ATS is so excited about these new products from Green Earth Technologies. Not only are they healthy for our world, they actually perform at expected levels.

In addition to Car Wash products, Green Earth Technologies offers products for the Lawn & Garden, Marine, and HouseHold industries as well. Their G-Oil™, a superior performance motor oil, is a perfect alternative to petroleum based motor oil.

###

Manufacturers of high quality, low maintenance self service car wash equipment, comercial reverse osmosis systems, and car wash replacement parts. Manufacturing, sales and service since 2000.
