*Dated: May 07, 2009*

*USA, Robert Kernodle, creator of The OMICRON Paintings, now offers to sell these enigmatic works of art at d'ART Fine Art, fine-art.com, a premier fine art website featuring some of the most creative living artists on the planet.*

USA, artist Robert Kernodle lists one of his most prized series of original paintings, **The Omicron Paintings**, at one of the internet's most well-established fine arts websites, d'ART Fine Art. Images of Kernodle's paintings, along with a complete description of his series appear at the following link:

**The Omicron Paintings** are stylistically different from Kernodle's later paintings, even though they embody his later philosophy called "fluidism". OMICRONS are visual precursors to his inevitable fluidism painting style. These strong, purposefully refined-brute representations of human (and one alien) anatomy symbolize Kernodle's concept of "space as substance". The concept of "space as substance", realized during this figurative phase, came to dominate his later efforts, which eventually involved experimenting with fluid dynamic flow.
