

Aluminum Entry Doors and Patio Doors with Wood Grain Finish

Deco Design Center now offers the latest technology in wood grain finish applied to entry doors and patio doors as well as decorative ornamental ironwork applications. Looks like real wood!

May 8, 2009 - [PRLog](#) -- Deco Design Center in Miami, Florida is pleased to announce the latest technology in door, window and ornamental ironwork manufacturing. Deco Design Center now can apply wood grain finish painting to any aluminum door, window, railings, gates, trellis and patio doors. This latest technology is keen to design and will give builders, architects, designers and home owners the look of real wood on their entry, patio, gates and railings and can even be used on Impact approved doors for customers that want the wood look but doesn't want real solid wood and prefer aluminum. Please check out our website at <http://www.decodesigncenter.com> or contact us for more details.

This method is the latest buzz among architects, builders and custom home owners in South Florida and the Caribbean!
