

Low-cost 13.56 MHz RFID reader features power supply by USB

By DAILY RFID CO.,LIMITED

Dated: May 13, 2009

DAILY RFID has launched a 13.56 MHz RFID reader designed as a plug-and-play device for industrial and outdoor environments, especially in process of writing data into tags. DAILY plans to market the 13.56MHz reader at \$48 per unit this month.

DAILY RFID has recently launched a 13.56 MHz RFID reader -02 designed as a low cost plug-and-play device for industrial and outdoor environments, especially in process of writing data into passive RFID tags. DAILY plans to market the 13.56MHz reader at a \$48 per unit cost this month.

Besides its low cost, this 13.56 MHz RFID Reader is a ideal choice for reading and writing tags since it features low power consumption. By inserting the 13.56MHz reader into PC and PDA via a USB interface, the integrated device can be used for most high frequency RFID applications.

The 13.56 MHz RFID Reader is engineered to provide a read range from 50mm to 100mm for close proximity RFID applications. Besides, it has Two-LED indication for standby search and data communications to make it convenient to use. It can be widely used in access control, time and attendance, industrial automation, process control and logistics, etc.
