Cleveland, OH: SmartVm now offering world best digital content creation, management and delivery solutions through hardware and software, announce today its video switches popular line of monitor switches. Video Switch enables multiple computers to share one or multiple monitors, projectors or any video displays with VGA ports. Video Switches allows you to maintain video integrity and provide clear & sharp images. VGA Video Switch enables up to 8 computers to share one monitor, projector or any video display with VGA ports. SmartVm has always been about creating highly compelling live video very cost effectively. Now we are making monitor switch production affordable. The industry's lowest power, smallest package Monitor Switch and VGA Splitter are designed for power, size and value-sensitive applications, such as volume notebooks and PC, as well as digital TV applications.

SmartVM has several styles of this VGA Over Cat5 allows long distance transmission of VGA video over standard Cat5 / Cat5e / Cat6 UTP cable while maintaining crisp. VGA video Extender is connected to the video source and the video display with standard VGA cables. VGA over Cat5 extender kits allow for adjustable signal length and equalization. The video Extender supports DVI interface for crisp and clear video quality on a Flat Panel Display. The easy to set up, install and use Cat5 VGA Extender is ideal for digital signage applications in hospitals, airports, restaurants, hotels, conference rooms as well as in secure military and commercial configurations.

Smartvm introducing their new digital VGA Splitter which allows for applications where you need to display the same image on up to 16 VGA monitors from one PC with VGA Video. Two models were announced today first is vga video matrix 8 in 8 out, with wireless remote and second is 4 port cat5 video splitter. The SmartVm VGA Splitter is compatible with PCs, SUNs and MACs with VGA Video. SmartVM VGA Video Splitter supports UXGA, SXGA, XGA, and VGA resolutions where space, power and cost pose significant barriers for other conventional video switch products.

SmartVm
