Role and significance of I.T in educational institutions and its contribution in Studies!

We know that the I.T has played an important role in every sphere of the life. Starting from Education to advancement in life styles and creating more opportunities for innovations.

The major role it has played is, in the educational institutions for training and teaching at one place and the Internet at the other where the students are free to access every information of interests and requisites.

Specifically speaking about the Internet, the source of information, the door of exposures, and the course of prosperity, is a core mean to enhance and apply over the capacities and capabilities among each other and across the Globe. There was a time, when students were over burdened of paying larger amount against tuition fees. Those who were able to pay the fee were able to get the higher education and consequently good jobs and cultural positions but those who were poor and were not able to meet the expenses, were devoid from the said.

The Information technology in the form of Internet, has overcome almost all of the problems those were of the major hurdles in the way of success. Moreover, has proven as the prominent tool to each advancement.
