*Sunset Records announced today its plans to begin the digital distribution of the top selling Full Moon Features Music Archives double (2) CD Soundtrack Set this month.*

Sunset Records announced today its plans to begin the digital distribution of the top selling Full Moon Features Music Archives double (2) CD Soundtrack Set this month. Don Lichterman, the head of Sunset released the details regarding the digital distribution of the highly anticipated archives music soundtrack retrospect for the world famous Full Moon Pictures Film Company.

Sunset is fast becoming known for its use of resources consistently finding some of the most unique music, keeping its label group fresh and relevant for music artists signed to the Sunset franchise, this year's release of the double CD retrospect soundtrack set continues this tradition with an eclectic mix of artists included on this 29 song double CD set. Obvious notable on this very special CD include Blue Oyster Cult, David Arkanstone, Mark Ryder, Charles Band, Richard Band, Rick Astley and Jane Wiedlin of the Multi Platinum pop legends, The Go Go's.

"The entire CD set is filled with exclusive tracks by these major recordings artists and not only will we work this CD in every way for the Full Moon Company," says (Don) Lichterman, "we are now able to license these songs out to the top digital retailers in the world." "We also get to grow the Full Moon Soundtrack franchise because I am going to use these songs for other projects like Veg hed, which is a CD compilation coming out this year at Sunset. I have ad placement at Relix Magazine, at the Bonnaroo Music festival in the daily newsletter and we will work promotions with their DVD releases this year. And, I am also in hope of getting placement into more films, more TV, in commercials, let alone our plan to release the entire set as ringtones, playback tunes, streams, on mix tapes, in community promotions, music downloads and for all digital sales."

"Richard Band and Charles Band literally made soundtrack recordings and did the film score for every Full Moon Film," said Don Lichterman. "With the Full Moon Archives Set, we get to continue the tradition if you will, of this great music, but all in one double CD set" "Richard Band and Charles Band are no doubt two of the top film score artists on the planet, their performances on this new CD set had all been originally recorded on their individual soundtrack CDs and rather than release all of them at one time this month, we have the special set that will now be available at every retailer and all over the world"

Lichterman goes on to say that "Full Moon to me is considered to be an important part of our culture in the world of entertainment, let alone in the obscure cult film world. This company has been around for years and for us at Sunset, they not only a goldmine of amazing music to work, its en endless amount of franchising and ancillary ways for us to work their catalog. We also releasing the their films exclusively with our strategic partner Amazon as Videos On-Demand."

Sunset is not only releasing this Archives Music set as a digital download, they have begun the process of setting up the Full Moon Features Films at Amazon also beginning this month. Along with setting up this very special CD for digital distribution, Sunset is unveiling the Full Moon Films On-Demand with the Full Moon Classics, Volume I DVD Set, Intruder, When Puppets And Dolls Attacks, The Dollman / Demonic Toys DVD Set, the Subspecies Epic Collection DVD Set and they will release more Full Moon Films as Videos On Demand for rent and sale at Amazon.
