

## **Offshore Trust with Offshore Holding Company and business bank account.**

*By Offshore Company Formation*

*Dated: Jun 08, 2009*

*An Offshore Trust for your offshore company structure, have a offshore trust in Cyprus in the top of your offshore company structure and a offshore holding company, will protect you against any liabilities, creditors or authorities.*

If the anonymity of your Offshore Company structure is important to you and the aim is to have a offshore company structure which is anonymous and which assets are protected, you will defiantly need to look into the formation of an Offshore Trust in Cyprus.

With a Cyprus Trust in the top of your Offshore Company Structure you are protected against almost any incidents that might come. Conducting legal business isn't without any risk and many startups are burning their hands while they are simply not aware of the ups and downs there are when doing business with others.

An Offshore Trust in Cyprus is known by many business professionals worldwide and is used even by Royals, VIPS and others which don't want to expose their income, turnover or equity to the public. While an Offshore Trust in Cyprus also protects your privacy and isn't subject to any tax what so ever, it has the major advantage for successful businesses to be used as investment tool. A Offshore Trust in Cyprus is allowed to form a Offshore Company in any other country, which includes but is not limited to, Belize, Seychelles or British Virgin Islands, the dividend of the offshore company can be moved to the Offshore Trusts without to have to pay tax. All funds, equity and other assets are protected by the general laws for offshore Trusts in Cyprus and can't be accessed by any court order, creditor or other authority if there isn't any proof if illegal activity.

When entering into any area of business you will quickly become familiar with other bad business owners which obviously only want to rip you off by selling you some service or product which you want need or even don't have any use for, those business people are clever and they only exist to rip of new businesses. You might think, fine, I can just don't pay their bills and that's it, but what if you already signed the contract with them, the business model itself might be legal so you are bound to the contract you signed! Now there is no way out (if you aren't protected by an Offshore Company Structure) then just to pay the bill and move on, try to make more money then what you just lost!

The mentioned scenario happens each day for millions of small business owners and entrepreneurs and there isn't really much help to get from any lawyer or authority here.

You will need to have protection against those and hundreds of similar incidents you will face during the lifetime of your business. An Offshore Setup where the Trust is in the top of your offshore company structure and a Holding company direct below the Trust, those people can jump into the sea, you don't need to worry their lawyers or collectors, it is impossible to access any of your money or assets!

CCLOGIC LLC has specialized in the forming of protected offshore companies and bank accounts, with many years of experience and many clients we so far helped it is now also possible for small and medium sized businesses to make use of our services.
