

Dryer Vent Repair is the Cure for most Dryer Related Problems

When a clothes dryer is not functioning properly the issue is most likely a venting problem

June 10, 2009 - [PRLog](#) -- Atlanta, GA – When clothes dryers begin to lose efficiency, taking longer to dry a load of laundry, many people are concerned that an expensive appliance repair bill is in their near future. According to Dryer Vent Wizard, a company specializing in clothes dryer exhaust issues, dryer vent repair and maintenance will solve most dryer functioning problems.

The National Fire Prevention Administration reports over 15,000 dryer fires annually; dryers with venting problems are the leading cause of these fires. Dryer Vent Wizard specializes in repairing dryer vents and dryer ducts to be sure they meet UL safety standards.

As explained by Dryer Vent Wizard, when clothes are tumbling in the dryer heat is applied, increasing the temperature in the drum to about 175 degrees, evaporating moisture and forcing it through the dryer exhaust ducts. The primary function of a dryer duct and vent system is to carry heat and moisture from the home. Many people believe it is responsible for removing lint; however, most lint trapped in the duct system remains there until it is cleaned out.

Dryer vent repair or cleaning is the likely cure for a clothes dryer that is not working properly. This is good news because the fee for dryer vent repair is often a lot less than the fee for appliance repair. According to Dryer Vent Wizard, in addition to being a fire hazard, clogged dryer vents cost consumers an additional \$18 - \$24 per month in energy costs.

Dryer Vent Wizard, Dry Clothes Safe Homes is a member of the National Fire Protection Association and the largest chain of dryer vent cleaning, repair, replacement and alternation specialists in the U.S. with nearly 50 franchisees in major markets in the U.S. Visit <http://www.dryerventwizard.com> for more information.
