*Dated: Jun 16, 2009*

*The acai berry has become one of the most popular and controversial health supplements of all time. Residents of the UK now have several options to get this supplement delivered to their front door including free trials.*

The acai berry has become one of the most talked about health and fitness supplements of all time. Many independent studies have shown that antioxidants provide a multitude of health benefits and this berry appears to be the king of antioxidants. New acai berry UK free trial offers have made this great supplement available to all residents of the UK.

The health benefits of the acai berry are threefold. First, it provides more antioxidants than any other practical food supplement. These antioxidants help stop the cellular damage caused by free radicals. Numerous scientific studies have shown that significant health benefits can be realized by supplementing with antioxidants. Additionally, acai berries contain omega fatty acids and fiber which have also been shown to have significant benefits including the potential for weight loss.

Acai berry supplements come in several different forms. The original supplement that was made popular was in juice format. It gained media exposure being promoted by a network marketing company and was featured on numerous talk shows and news programs. Since then, supplements have become available in capsules as well as powdered form which can be added to yogurt, put in smoothies, or added to health recipes.

The most recent development is offers like the acai berry UK free trials mentioned above. By paying for shipping, consumers can get free samples shipped straight to their front door for a fraction of the cost of buying them at a health food store. If the consumer likes the supplement, they do nothing and get recurring monthly shipments. If they chose not to receive further shipments, they cancel the auto-shipment and keep the free trial.

The most popular offers include the Acai Burn UK Free Trial and the Acai Berry Blast UK Free Trial. You can get more information at <http://www.acaiberrypill.info/> about these and other acai berry offers.
