

GreenerGreenGrass Adds EZ FLO Fertigation Tanks to Product Offering

By GreenerGreenGrass

Dated: Jun 17, 2009

Natural Liquid Lawn Care Products are Easily Applied with Fertigation Systems

PORTLAND, ME — GreenerGreenGrass, seller of all-natural and organic lawn care products in liquid form, now offers EZ FLO fertigation tanks through their online store www.GreenerGreenGrass.com. The tanks, which are available in 1.3 and 3.0 gallon sizes, allow customers to apply liquid fertilizers and other lawn and garden products while irrigating. EZ FLO fertigation systems, which can be connected to sprinklers or hoses, use a patented flow technology to maintain a constant ratio of fertilizer to water. An adjustable cap allows the user to regulate how much fertilizer flows through the system, preventing over-application and ensuring no product is wasted.

The entire GreenerGreenGrass line of products can be applied through the fertigation systems, and individual products can be combined in the tank for maximum efficiency. In addition to liquid fertilizers, GreenerGreenGrass offers natural liquid aerators, dethatchers, soil boosters, insecticide, and mineral blends, all of which can be applied through the EZ FLO fertigation system.

Founded in 2008, GreenerGreenGrass is dedicated to providing natural and organic lawn care products that are safe for children, pets and the planet.
