Fans of the iPhone are cheered when Apple's iPhone 3G S made its debut. Also, most users would like to put DVDs movie video on iPhone 3G S. So, this guide is designed to help you rip DVD and convert DVD videos to your iPhone 3G S(iPhone 3.0), so that you can play your favorite DVD movies Video on your iPhone 3G S(iPhone 3.0)as you like.

Here is the detailed information:

1. Apple iPhone 3G S Review.
- 2.How to convert DVD files to MP4/MOV/AAC formats to play on iPhone 3G S?
3. How to convert AVI, WMV videos to iPhone 3G S MP4?
4. How to put DVD Video on iPhone 3G S?

Part 1: Apple iPhone 3G S brief Review

The iPhone 3G S (the 'S' stands for speed) hit UK stores on 19 June. It promises to be a faster iPhone with an extended battery life, more memory and improved features. It looks exactly the same as the previous model, but both the 16GB and new 32GB model will come in white and black versions.

Fortunately, the 3G S comes with a 3 megapixel camera, which should take much better pictures, especially that it also features autofocus. Voice control is another one of the new features iPhone 3G S comes with, and it will do a lot of things, like voice dialing and some interesting controls.

Part 2: How to convert DVD files into MP4/MOV/AAC formats to play on iPhone3G S?

Before you transfer DVD videos to iPhone 3G S, you need to convert DVD to iPhone compatible format first. Please download Daniusoft DVD to iPhone Converter(<http://www.daniusoft.com/dvd-to-iphone.html#141>), install and run it. It is one of the best DVD to iPhone 3G S Converter, which can help you rip DVD to iPhone 3G S MP4/MOV/AAC video and audio formats.

Then we can finish the conversion in 4 simple steps:

Step 1: Import DVD files.

Please insert the DVD to convert, you can either click Add button to insert the DVDs you want to convert?or easily drag & drop the DVD files into 'Getting started' table.You are allowed to load DVD Rom, DVD folders, ISO files or IFO files respectively.

Step 2: Edit video files.(optional)

After loading DVD files, you are allowed to make the perfect editing of videos by cropping, trimming, effect adjusting and watermark designing by clicking "Edit" button. In this procession, you can get

appropriate video size designed for your iPhone 3G S, make special effect to your video, split your video into segment, and color your video by adding some text or image information as watermark.

Step 3: Customize output settings.

Click the "Convert to" drop-down menu to select "iPhone -> iPhone 3G video MPEG-4(*.MP4)" or

"iPhone 3G MOV 640X480(*.mov)" as output audio format;

Click the "Target Path" button to find the destination folder for saving output iPhone 3G S MP4 or MOV files;

Click "Settings" button in the output settings area, you are allowed to customize the output parameters;

A regular DVD movie has multiple subtitles and audio tracks, and you can select the right one for you.

Step 4: Start conversion.

Click "Start" button on right bottom of the main interface, you are allowed to start conversion. All the DVDs will be converted to iPhone 3G S format at fast speed and high output quality. You can view your converted files by press the browse button, or you can choose to turn off computer after conversion.

Part 3.How to convert AVI, WMV videos to iPhone 3G S MP4?

iPhone 3G S can only play MP4 and MOV video, so if you want to play incompatible Video files on iPhone 3G S, you need to convert them to iPhone 3G S MP4, and then sync it to iPhone 3G S via iTunes. I strongly recommend Daniusoft Video to iPhone Converter(<http://www.daniusoft.com/video-to-iphone.html#141>). It is one of the best iPhone 3G S Video Converter, which can help you convert video to iPhone 3G S MP4/MOV/AAC video and audio formats with high output quality.

The way to convert Video to iPhone 3G S is also very simple, just import Video to Daniusoft Video to iPhone Converter, choose output format, and click "Start" to began the conversion

Part 4: How to transfer converted files to iPhone 3G S?

After convert DVD, WMV, AVI, FLV etc to MP4/MOV/AAC etc, now we can import the converted files to iPhone 3G S.

First, you need to launch iTunes, click File option on menu, and add your converted files to iTunes library. Then?connect your iPhone 3G S to computer via USB cable, iTunes will detect your iPhone 3G S. After that, click iTunes "File -> Sync iPhone", and the files will be transferred to your iPhone 3G S from iTunes library. When updating completed, you will find the videos on you iPhone 3G S/iPhone 3.0.
