Can't Find What You Are Looking For Here? Let Us Know.

If We Don't Have What You Are Looking For It's Ok.

We Will Search For A Solution For Your Needs And Help You Find It.

No Matter Who Is Selling It, We Will Find It For You.

Our Goal Is To Help Others With Solutions, Even If The Solution

Is With Another Company. So Go Ahead And Ask And Let's Work

Together To Solve Your Problem.

Included with the Personal Assistance Emergency Phone Dialer is (4) Heart Pendant (100 foot range). Simply push the Emergency Call button, holding it down for 4 seconds. It will send a RF (radio frequency) signal to the main console, which will trigger an alarm and call your 4 numbers in order for emergency help.

Included is also 5 Wireless Panic Buttons. Place them anywhere, in the bathroom, on the wall, on a desk. (100 foot range)

Personal Assistance Emergency Phone Dialer- System Features

Personal Monitoring - the system calls family and friends or 911 instead of a monitoring company

Save money - system works right out of the box with no monthly fees to work
No wiring or installation fees - set it up yourself with ease
Wireless one-touch help - heart-shaped remote can be worn around your neck
Listen in - hear what's going on when the system calls you
Loud Siren Alarm - so neighbors will be alerted when help is needed (we also have alerts with no Loud Siren Alarm)
(If you want to diable the alarm we will email you instructions on how to disable it)

CONVENIENCE

There are no contracts to sign or monthly fees to pay; once you buy it you own it with nothing more to pay to operate it. The system is very easy to set up yourself and doesn't require any installation, only a power outlet and a phone jack. And, when your system is up and running you can program it to call 4 of your most trusted family members and friends or 911 to respond to any help alert rather than trusting a company to make decisions for your loved ones. Keep the protection of your family in the hands of family.

No worry, One-touch help

The greatest worry we all have when a family member needs extra assistance is if they will be able to get to a phone if something happens. With the Personal Assistance Emergency Phone Dialer Console and wireless heart-shaped remote they can wear the phone around their neck. Just one push of the alert button and the console starts to make phone calls until someone answers. So, you no longer have to worry if your loved one will be able to get to a phone because they will always have one with them at all times.

Alerts people who are close by

If for some reason the phone numbers that are programmed into the console gets no response from anyone there is a loud siren alarm built into the system to alert anyone close by. It's loud enough to alert neighbors or people walking by the house so even if no one responds via telephone it's possible that a neighbor will hear that help is needed and take appropriate action.

This system is compatible with other security modules so along with the console's siren you can also add Lamp Modules that will flash lights on and off so neighbors can hear and see that help is needed. Also, extra PowerHorn alarms can be added to other parts of the house, even outside, to give you extra sound power.

Also, your loved one can wear the heart pendant around their neck at all times. In a sudden emergency event (fall, heart attack, etc) they can simply push the button and emergency help will be notified immediately!

Personal Monitoring FAQ

Q. Does the system call your company when help is needed?

A. No. We didn't make this system for us to make money off of you every month to do something that you can do yourself. The system will call up to 4 of your most trusted family members and friends or 911. People you can trust should be the first to know when something happens. Although, we offer monitoring if you feel that you need a little extra assistance.

Q. What happens if the alert is just a false alarm, do you charge a fee?

A. Absolutely not. There are no false alarm fees, ever! When the system calls you then you can listen in to what is going on to see if help is needed or if the remote just got bumped.

Q. What if no one answers the phone when the Personal Assistance Emergency Phone Dialer calls?

A. The Personal Assistance Emergency Phone Dialer will continue to call over-and-over until someone answers it. If you miss the first call, it will call you again after it tries the other 3 phone numbers until someone responds. Plus, the console comes with a loud siren so there is a chance that a neighbor will hear the alarm and take action.

Q. Will I need to hire someone to install the system?

A. No. The system works right out of the box and you can set it up yourself very easily.

Q. Can I add other products to the system?

A. Yes. You can add Lamp Modules for flashing light alerts and sirens for added alarm power.

These systems will not be fooled by answering machines!

How does it work?

When a pendant is pressed the system dials the first number that is programmed into it. The system then waits to 'hear' a zero (0) to be pressed on the other end of the line. This tells the system that a human answered the call. If the systems hears a 0 it will stop calling numbers and turn on the speakerphone. If the system does not hear a 0 pressed it will hang up and call the next number in sequence. We suggest that you have 911 programmed at the end of the call list to ensure that someone is contacted in the event of an emergency.
