

Chem-Dry Carpet Tech awarded the Gold Seal of Approval by the Carpet and Rug Institute (CRI)

Chem-Dry Carpet Tech has been awarded the Gold Seal of Approval by The Carpet and Rug Institute for performing outstanding cleaning services.

June 29, 2009 - [PRLog](#) -- Chem-Dry Carpet Tech has been dedicated to providing exceptional carpet, upholstery, tile, and grout cleaning services since 1992. For performing carpeting cleaning procedures on difficult stains and heavy soiled areas without damaging the carpets, we received the Gold Seal of Approval. The Gold Seal of Approval is the highest awarded Seal issued by The Carpet and Rug Institute. Chem-Dry Carpet Tech has been awarded the Gold Seal of Approval because we have proven to extract the highest amount of measurable soil from carpets, leaving customers the most satisfied, and with the cleanest carpets.

The Carpet and Rug Institute (CRI) is a nonprofit trade association that applies science to find the best procedures and products to improve the quality and life of carpets. The CRI also represents 95% of carper manufactures, as well as their service providers in the United States. They developed the Seal of Approval awards to differentiate superior carpet cleaning procedures from procedures of poorer quality. The Gold Seal of Approval ensures that carpets maintain their original beauty after cleaning, helping customers save an incalculable amount of money by not having to replace their carpets as often.

The Gold Seal of Approval is one of many unique qualities Chem-Dry Carpet Tech obtains that makes us more advanced than other carpet cleaners in the industry. We use a low moisture deep extraction method of cleaning. Especially with the drought concerns occurring in California, it has become increasingly crucial to lower our water consumption.

Chem-Dry Carpet Tech only uses 1/5 of the water used by other carpet cleaner. This allows carpets to dry in a few hours as opposed to days, so that carpets can be enjoyed on the same day they are cleaned. The low moisture process also eliminates the concern of possibly over saturating customers' carpets. By not over saturating carpets we run no risk of mold or mildew from forming, and there is no damage to the padding or the fibers of the carpet.

Being awarded the Gold Seal of Approval does not compromise our commitment to have as little impact on the environment as possible. Chem-Dry Carpet Tech uses a patented carbonated mineral solution that is mostly all natural in content. Our process is 100% hypoallergenic so it is perfectly safe for kids and pets and our solutions are all Non-Cationic. Also all of our ingredients are in the GRAS List (Generally Recognized as Safe) and are Ph Neutral.

Chem-Dry Carpet Tech services homes and commercial properties by extracting the highest amount of soil as recognized by The CRI with our God Seal of Approval. We leave carpets looking new, leaving no dirty footprints on our environment.
