The phone has an internal 2.2 inch TFT display screen which offers a resolution of 240 x 320 pixels with 256,000 colour variations. This is suitably large enough to view images in crisp contrast and with excellent colour reproduction. The secondary screen is the external screen which can be seen on the outside of the casing and is 1.1 inches and monochrome.

The phone comes with a 3.15 mega pixel camera with a resolution of 2048 x 1536 pixels. This is good enough quality to take engaging snap shots. The camera also doubles up as a video camera with QVGA quality and 15 frames per second. The phones internal memory is 100 Mb but this can be supplemented by using the memory stick micro facility to increase memory storage up to 16 Gb.

The phones overriding feature is its Walkman MP3 player offering. It's an effective element of this phone and produces excellent sound quality. MP3, AAC and WMA can all be played by this media player. One method of control of this player is provided by means of Sony's shake control facility which enables its user to change tracks by simply shaking the phone. Other useful features included are the TrackID music recognition and SenseMe functions. The phone also provides an excellent FM stereo radio for alternative listening pleasure.
