Dated: Jul 03, 2009

The Nokia 5130 Blue heralds another colour variant of this popular series of mobile phones.

The Nokia 5130 Blue heralds another colour variant of this popular series of mobile phones. Its innovative manufacturer Nokia has endeavoured to offer another version which provides greater choice to the consumer. This blue version has the same specification as the other colour variants but is simply encased in a blue casing.

The phone features a 2 mega pixel fixed focus camera with a resolution of 1600 x 1200 pixels. This is suitably good enough resolution to take effective snapshots. The camera also offers QCIF video capture at 15 frames per second. Images can then be viewed on the impressive 2 inch QVGA display screen. The screen has a resolution of 240 x 320 and displays over 256,000 colours which means that images are clear and reproduced with excellent colour reproduction.

The phone provides memory storage capability of 16 GB by making use of the built in microSD slot with Transflash. GPRS and EDGE technology are provided both of which are class 32 as well as USB and Blue tooth. This offers the means of transferring files or synchronising the phone with a PC

The MP3 player provided with this phone supports all the major audio file formats including MP3, AAC and WMA. This ensures that the majority of downloaded files are playable. A stereo FM radio with full RDS support provides access to local and national radio stations. This offers a viable alternative to the MP3 player and affords the user the opportunity to listen to news and weather broadcasts as well as musical programs.

The Nokia 5130 Blue is an affordable alternative which offers Nokia styling and functionality in a tidy casing. Its blue colouring offers a variant that is refreshing and enjoyable to behold. The features of the phone provide a wealth of opportunity to take images, whether static or moving and listen to a variety of music, whether downloaded or through the radio.
