An impressive 3.5 inch TFT capacitive touch screen lights up the front of this phone and displays up to 16 million colours at a resolution of 320 x 480 pixels. This means images that are portrayed on this screen are vibrant and have excellent colour reproduction. The screen comes with an accelerometer function, this facility auto rotates images so that they are viewed in their correct aspect whether that is portrait or landscape. The touch screen uses a multi touch input method which is extremely useful and provides a quick and effective method of navigating through the functions.

A 3.15 mega pixel camera is provided which has a resolution of 2048 x 1536 pixels. The photo taking aids include auto focus, touch focus, which is very useful and geo-tagging. The camera also provides video capture at VGA quality and at 30 frames per second which ensures good quality video footage and clear imagery. The internal memory of this phone is expansive to say the least, being 16 Gb and at this level of memory storage, is large enough to retain numerous media files.

The HSDPA connection offers web browsing by offering internet connectivity at speeds of up to 7.2 Mbps with Wi-Fi offering additional means of connecting to the internet via publicly available hotspots. The phone also provides GPS with A-GPS support and includes Google maps within its offering, which is a popular feature that has become more widespread recently. An audio/video player as well as a digital compass is also included within the suite of additional extras.

The Apple iPhone 3G S 16GB White offers sumptuous decadence. Its stylish looks have made it the popular mobile phone that it is today. Its wealth of functionality has empowered this handset and ensured its continued success.
