*Body Contouring procedures are growing in popularity in the United States and in general. South Jersey is no exception. There are few Physicians in this area that specialize in Laser Body Sculpting and fat transfers like this acclaimed Liposurgeon.*

Dr. Jose Diaz-Jimenez, M. D. has perfected this revolutionary procedure that is dramatically improving how his patients feel about themselves. Let's face it, when you feel better about your appearance you and everyone around you benefits. Everyone notices your better posture, attitude and self confidence. Your chances for promotions, greater income and better relationships are dramatically improved.

Patients that are candidates for this procedure are people who have areas of stubborn fat that cannot be eliminated with diet or exercise. People that are at appropriate weight or moderately overweight can benefit and there are no absolute age limits. Both men and women can benefit from this revolutionary procedure. We all want to look our very best. The most commonly requested areas for Laser Lipolysis are the belly, love handles, inner and outer thighs and back. However, other areas that can improve from liposculpture are the arms, neck, knees and the male breast.

It is performed under local anesthesia and the downtime is minimal. Patients can return to work within 2-3 days. They wear a compression garment for 2 weeks. Most patients resume their regular exercise routine in fourteen days. Results are usually evident immediately and because a laser is used, the skin tightens as apposed to traditional liposuction where there was no tightening.

DR. Diaz specializes in cosmetic liposurgery in all areas of the body and also performs the Brazilian butt lift. Patients travel to see him from Burlington, Camden, Salem and Cumberland Counties because of his skill and artistry. His attention to details, fantastic results and commitment to excellence place him as one of the top liposurgeons located in South Jersey and Philadelphia region.
