

PerMedics Inc. Releases Version 4.5 Of Its Odyssey Intuitive Radiation Treatment Planning Software

By PerMedics Inc.

Dated: Jul 09, 2009

PerMedics, Inc., developer of the Odyssey Intuitive Radiation Treatment Planning Software, announced their latest Odyssey Version 4.5, on July 9th 2009.

San Bernardino, CA- PerMedics, Inc., developer of the Odyssey Intuitive Radiation Treatment Planning Software, announced their latest Odyssey Version 4.5, on July 9th 2009. Originally developed in conjunction with the world's first hospital based proton therapy center, Loma Linda University Medical Center, Odyssey has grown to be an industry leader in multi-modality radiation treatment planning. Odyssey Version 4.5 will have its public unveiling at the 51st annual American Association of Physicist's in Medicine (AAPM) trade show being held in Anaheim, CA on June 29th, 2009.

Odyssey's version 4.5 further enhances the planning system's capabilities to provide non-proton facilities with state of the art conventional radiation treatment planning. With version 4.5 the Odyssey system improves upon the efficiency of its conventional therapy planning techniques for treatment types such as Intensity Modulated Radiation Therapy, Stereotactic Radiosurgery and Virtual Simulation.

Rick Baldini, President of PerMedics, Inc. stated that he is "very pleased with the progressive nature of the Odyssey platform and considering the advancements found in the latest software version, anticipates an increase in PerMedics' market share both domestically and internationally". Odyssey version 4.5 is available for immediate release for both new customers and current customers using older versions of the Odyssey software. PerMedics currently offers online demonstrations of the Odyssey system including the latest system enhancements. Demonstration information is available by contacting support@permedics.com
