

DSC ALEXOR PC9155 Wireless Alarm Panel offered by Absolute Security, Fire & Design

The new DSC PC9155 ALEXOR now available in our Do It Yourself category

July 13, 2009 - [PRLog](#) -- It's here! The long awaited DSC ALEXOR PC9155 Wireless Alarm Panel has been launched!

This new system is going to cause the alarm industry to really take notice. DSC has introduced a "truly wireless" panel with great wireless range, many user functions that make sense, and ease of programming.

With only 1 wire required for power to main control panel, all other devices including the keypad and siren run on batteries. **NO WIRES!** In an older home, multi-level home, historic building, or any other place that's considered impossible to run a wire to a device, this system fits the bill perfectly.

DSC has long since been a leader in the home and commercial security and fire alarm industry. This system has redefined the wireless security market.

ALEXORS many features include:

- 32 wireless zones, 16 wireless keys (without using a zone slot)
- Wireless quick enroll
- Template programming
- 16 user codes, 1 master code and 1 maintenance code
- Account code error checking (patent pending)
- Alternate communications via GSM/GPRS and IP
- Onboard siren at 85dB
- 2 Input/Output terminals
- 200mA Aux Output
- 500 event buffer
- Wall and case tamper
- 24Hr Battery backup

One of the best features I believe is it's overall price. With not having to spend money on wire and labor for it's installation, the overall cost is generally less than most professional installed hard-wired alarm systems.

The ease of use and installation of ALEXORS' devices make it perfect for our Do It Yourself category on our website. Absolute Security, Fire & Design offers this system and its devices fully programmed for our customers that want to do it themselves and save money. Our company will pre-program all devices so a customer can self-install these units simply by watching our on-line videos. We will also offer tech support as well for the occasional question.

For further information, check out our website at <http://www.absolutesfd.com> or call 479-925-9200.

###

An alarm company in Northwest Arkansas specializing in high-end fire alarm, CCTV, security and access control systems. Our company was established in 1991. With the growing demand for DIY products, we opened a separate division relating to those needs.
