

## **uCertify Offers a Discount of 50% on Its N10-003 & SY0-101 Exam PrepKits**

*By Roger Stuart*

*Dated: Jul 20, 2009*

*Get 50% discount on N10-003 and SY0-101 certification PrepKits*

uCertify, a leading provider of exam preparation software for IT certification exams, is offering a huge discount of 50% on its Network+ (N10-003) and Security+ (SY0-101) PrepKits. CompTIA has announced the retirement of the Network+ version 2007 (N10-003) and Security+ (SY0-101) certification exams. These exams will be available until July 31, 2009. According to CompTIA, although these exams are being retired, the certification status of candidates will not change. So, the candidates who have been preparing for these exams for a long time are advised to take the exam as early as possible.

uCertify is offering a discount of 50% on both PrepKits. To get a glimpse of these PrepKits, you can download its free demo version (which contains 15 free practice questions) from:

For Security+ (SY0-101) certification PrepKit: <http://www.ucertify.com/exams/CompTIA/SY0-101.html>

For Network+ (N10-003) certification PrepKit: <http://www.ucertify.com/exams/CompTIA/N10-003.html>

Network+ is a certification that is used to measure skill as a network technician: understanding of network hardware, installation, and troubleshooting. Network+ was first launched in 1999. Topics include network hardware, connections, software, the OSI Reference model, and different protocols used in local area networks (LANs) and wide area networks (WANs). Network+ prepares one for continuing to Microsoft certifications and Cisco certifications. A combination A+/Network+ or A+/Server+ certification can fulfill the elective exam requirement of the Microsoft Certified Systems Administrator (MCSA) certification.

The full version of this PrepKit, which is available at an unbelievably low price, contains 7 interactive practice tests with over 568 challenging questions guaranteed to comprehensively cover all the objectives for the N10-003 exam, over 200 study notes, interactive quizzes, technical articles, and flash cards.

The newer version of Network+, 2009 edition (N10-004) is available at uCertify with 8 interactive tests, 635 challenging questions, and 186 study notes. To know more about N10-004 (2009 edition), visit the link below:

Security+ is a certification dealing with computer security topics such as cryptography and access control. It was developed in 2002 to address the rise of security issues. Currently and according to CompTIA, more than 45,000 people around the world have earned this certification. It is recommended that candidates have two years of security related work experience (although not a requirement) and pass the 100 question multiple-choice exam. The Security+ exam can be applied as an elective to the MCSA: Security and the MCSE: Security specializations from Microsoft. A new 2008 update of exam SY0-201 was released in October 2008 incorporating new objectives and has a passing score of 750 on a scale of 100-900.

This newer version is available at uCertify with 8 interactive tests, 680 challenging questions, and 309 study notes. To know more about SY0-201 certification PrepKit, visit the link below:

The uCertify PrepKit for Security+ 2008 Edition (SY0-201) is co-authored by Chuck Easttom who has 15+ years of IT experience, holds a plethora of industry certifications, and currently is an independent consultant, and an adjunct computer science instructor. Chuck is the author of 10 computer science books and has been a subject matter expert for CompTIA, and is working on Linux+, Security+, CTT+, and Server+ certification exams.

Mark Smith, Director of Product Management, uCertify, remarked, "We at uCertify get the services of certified IT professionals, and experienced authors who are a part of our research and training programs. These professionals prepare authentic and well worked-out study material on various certification exams. This PrepKit will not only enable candidates to pass the exam but also to face the challenges of real world situations."

He further added, "Our platform focuses on learning while you achieve your continuing education goals. Users can switch between Learning and Test modes. In Learning mode, you will find a plethora of study aids such as detailed study notes, tagging, flash cards to help you remember important facts, pop quizzes to reinforce concepts just learned, the ability to add your own comments to reference material and much more. In Test mode, you will be able to gauge where you stand with our quick diagnostic test. Next, we guide you through the various steps required to pass a given test. Choose as little or as much guidance as you want." Mark is a Network Expert who has more than 10 years of IT experience and has written numerous articles on the subject.

uCertify offers you an unconditional 100% exam pass guarantee! With a monstrous success rate of 99% over the last 13 years and an unshakable faith, uCertify brings to you an excellent opportunity to become certified instantly. In case you are not able to pass your certification exam even after using uCertify PrepKit, you will get a refund on the entire amount you spent on the PrepKit. Check out these uCertify PrepKits at:
