*The July 2009 edition features tips for better composition and also examines portrait lighting and composition techniques in a brand new "Portraiture Photography 101" series. Several Photoshop tutorials and DSLR tips packed in this release!*

VANCOUVER, CANADA – PhotographyBB announced today, the release of the 18th edition of the PhotographyBB Magazine Online. The PhotographyBB Magazine Online is now a leading resource in the future of free information distribution, offering readers: Digital Photography tips and techniques, DSLR camera function training, and image post processing tutorials in Adobe® Photoshop™, and RAW processing in Photoshop Lightroom™.

The July 2009 edition features a look at the new Pentax K-7 digital SLR, along with several articles on tips for better photographic composition techniques. Readers have their questions answered in the continuing FAQ series where real questions from our readers are anonymously and thoroughly answered. The July edition also examines portrait lighting and composition techniques in a brand new "Portrait Photography 101" series.

Editor in Chief, Dave Seeram had these comments regarding this recent release:

"The name of the game for issue 18 is all about composition. This month we take an in depth look at symmetry; how it is everywhere in our lives and how we can use symmetry to create stunning photos. We also take a different look at the Rule of Thirds as it applies to both photography today, as well as historical works of art in the past. In keeping with the composition theme, this month's Photoshop tutorial teaches our readers how to create a digital composite image by adding fireworks into any night photo scene.

In our Photography Around the World column, photographer David Martin takes us to Australia for a look at the splendor of the scenery, rainforests, wildlife, waterfalls and so much more."

By way of download in either PDF or ZIP formats, PhotographyBB continues its trend through the future of free downloadable magazine distribution. In a completely ad-free format, each issue contains informative and educational tutorials for amateur and intermediate level photographers.

In addition to articles which aide photographers in getting the most from their DSLR cameras, the PhotographyBB Online Magazine also features useful and applicable tutorials on how to use post-processing tools such as Photoshop and Lightroom, to build on digital photography post-processing skills.
