

School Districts Find Solution to Rising Fuel Costs

By Platinum Power Group LLC

Dated: Aug 03, 2009

While many school districts are forced to take a step backwards with the elimination and consolidation of bus routes, others have partnered with a global company to bring about local solutions...

“Cutting fuel costs is probably the greatest problem that anyone in transportation is facing right now.”

As school districts continue to face increased fuel costs and related operational expenses, transportation directors across the US have taken a direct role to steward innovative solutions.

While many school districts are forced to take a step backwards with the elimination and consolidation of bus routes, others have partnered with a global company to bring about local solutions. Platinum Power Group - PlatinumHorsepower.com - is a leading global manufacturer of Plug-in Power performance products for CAT Diesel Engines. They have been equipping Caterpillar Diesel Engines worldwide with more horsepower, for several years. Private fleets, Owner-Operators and truck drivers across the globe continue to report substantial fuel savings.

“School districts are facing higher fuel costs every day and require immediate and flexible solutions. The adoption of renewable fuels and performance products that deliver on horsepower and fuel economy will become the status quo. We have built a strong alliance with Transportation Directors to aid them in maximizing their bottom-line,” said a spokesman for Platinum Power Group LLC.

###

We are the leading global manufacturer of Plug-in Horsepower products for CAT Diesel Engines. We proudly serve the On-Highway, Industrial and Marine Engine markets -- equipping Caterpillar Diesel Engines worldwide with more horsepower. In this ever-changing market our customers depend on Platinum Power Group products to get more life out of their engine, increase horsepower and in many reported cases, increase fuel economy.
