Now you can have a fuller head of hair and end your worry about hair loss without chemicals or a huge expense. Todd Davis, founder of Natural Hair Regrowth finally reveals all the secrets that helped him overcome the baldness.

Aug. 28, 2009 - [PRLog](#) -- Now you can have a fuller head of hair and end your worry about hair loss without chemicals or a huge expense. Todd Davis, founder of Natural Hair Regrowth finally reveals all the secrets that helped him overcome the baldness.

A brand new website gives you inexpensive access to all the steps to take to give you more hair. Natural Hair Regrowth isn't selling you expensive herbs and bottled applications that you have to purchase every month. Instead, after years of trying almost every product and natural cure, Todd Davis developed a technique that really works and it doesn't cost a fortune to follow.

Todd comes from a family where balding is a plague, but none of his family was willing to sit back idly and allow it to happen without a fight. He watched as his father tried preparations and concoctions but it wasn't until he noticed his hair thinning that he decided to take action. In his quest to solve the problem of thinning hair, he started with solutions and remedies first until one day, he realized, he had to find the cause and that would lead him to his answer.

The real problem isn't with the hair itself but the follicle beneath the scalp. It needs food and oxygen to survive or the follicle dies. The result after too many follicles die is, of course, balding. He hunted for other answers because this seemed too simple. That's when he began to formulate and test his plan of action. It took more than one type of treatment to restore his hair.

Trial and error combined with endless hours resulted in his success. Todd wanted to share this opportunity with other frustrated men and women who experience the pain connected with hair loss. He knew that most people were like him, they would try anything to restore their crowning glory but he wanted it available to as many people as possible and give them dominion over their success. The only way to do this was produce an inexpensive manual that outlines the steps to take. The only way to keep it inexpensive was via an ebook format.

The ebook shows how to increase the oxygen and blood supply to the hair follicle. It has easy to follow instructions on removing the dead cells and dried sebum that often traps the hair follicles and holds in bacteria. Best of all his method uses all natural ingredients so there's never a chance of introducing toxic substances into your system through the pores in your scalp. Unlike expensive hair growth products, his solutions never need a warning label.

Todd's ebook and other relevant information is available at his new website Natural Hair Regrowth located at <http://www.naturalhairregrowth.net>. The information provided there and the testimony from others that tried the program is not just interesting, it's compelling. He also offers six bonus books with other valuable information as a gift for those that order.

--- End ---
