

StarDot Technologies Partners with VideoProtein Video Management System

By VideoProtein

Dated: Sep 10, 2009

High Definition NetCam SC megapixel cameras are now integrated with surveillance software and systems from VideoProtein

VideoProtein Systems, Inc., the leading provider of IP surveillance solutions, and StarDot Technologies, a leading manufacturer of high definition IP video cameras and video servers, have partnered to deliver unparalleled IP video solutions to the security industry. StarDot cameras are now fully integrated with the VIDEOProtein 3.0 video management solution.

VIDEOProtein 3.0 web browser based software is designed for cost efficiency, scalability and ease of use. The Java-based software runs on Windows, Mac, Linux or Unix platforms. VIDEOProtein 3.0 will support any IP video device, yet offers advanced capabilities including archiving, motion detection, event viewer, notification, and a variety of other important features. It's designed to be an inexpensive and complete surveillance solution for small, mid-range and enterprise level installations that allow users to fully take advantage of the high picture quality offered by StarDot cameras such as the NetCam SC series.

StarDot's seamless integration with VIDEOProtein 3.0 offers customers a robust solution covering a wide variety of security applications that require high speed recording, scalability and the ultimate in video clarity. "The StarDot Video Image Engine processor in the NetCam SC Cameras is an excellent complement to the VIDEOProtein 3.0 platform," said Vance Kozik, StarDot's product manager, "VIDEOProtein 3.0 software provides an intuitive interface to our cameras, including digital pan/tilt/zoom functionality. The combination provides an ideal solution for replacing multiple CCTV cameras with a single wide angle megapixel camera."

"We're very excited about supporting StarDot's high definition IP video cameras and their integration with our video management software," said Paul DiBerardino, VP of Sales at VideoProtein. "StarDot's cost-effective high definition video cameras are very reliable, and we are proud to add them to our list of cameras fully integrated with our software."

About StarDot

StarDot Technologies is a designer and manufacturer of IP video solutions and has built a reputation on image quality, ease of use and reliability. The StarDot Image Engine found in the NetCam SC cameras is built around 15 years of digital image processing experience. The NetCam SC security line is sold through US and international distributors and resellers in the security industry. StarDot provides solutions to a wide variety of organizations, including the FAA, NOAA, NASA, Starwood and NavCanada. The business sector includes security, tourism, construction, education and government. www.stardot.com

About VideoProtein

VideoProtein is the manufacturer of intelligent IP video hardware and software platforms that are capable of managing local or remote monitoring, recording, event motion capture and notification from IP video cameras. VideoProtein products are designed to meet the customer's requirements for ease of use and installation, flexibility, and higher quality/resolution inherent in Megapixel IP Video.

VideoProtein is the only IP software platform that runs natively on Windows, Linux, Mac & Sun Solaris server OS platforms. VIDEOProtein 3.0 is designed to run in a "Microsoft - Free" environment. Visit us at www.videoprotein.com.
