

## **Insulated Pex Pipe by East Lake Alternative Energy**

*Insulated Pex Pipe designed by East Lake Alternative Energy will endure the most extreme climates and conditions. TriPex is a top-of-the-line water transfer line, consisting of a two pipe system insulated in a triple wrap closed cell foam insulation.*

**Sept. 10, 2009** - [PRLog](#) -- East Lake Alternative Energy offers a new yellow corrugated insulated Pex pipe, on September 9, 2009.

East Lake Alternative Energy has been working to produce a product that was both highly efficient and cost effective. They spent tens of thousands of dollars manufacturing and perfecting a machine that will produce the quantity and quality of insulated pex pipe demanded by the increase of consumers looking for alternative heating systems and better products. Insulated pex pipe is the conduit that connects outdoor wood boilers to a water to air heat exchanger used with most existing conventional heating systems and gas furnaces.

The owner and CEO, Mike Nyhof said, "people are not only tired of the rising costs of gas and oil, but it is getting to the point where it is not affordable for many people, now working less hours because of the slowing economy. People are being forced to look for alternatives to keeping their families warm this coming winter."

TriPex Insulated Pex Pipe was designed by East Lake Alternative Energy to endure the most extreme climates and conditions. TriPex is a top-of-the-line water transfer line, consisting of a two pipe system (supply and return), insulated in a triple wrapped closed cell foam insulation. The wrapped Pex pipes are shielded from harmful environmental particles and conditioned by a flexible plastic corrugated pipe. Less heat loss means higher efficiency and more savings.

Mike also said, "People everywhere are claiming that the heat that outdoor wood boilers produce are noticeably more comfortable, so we made TriPex Insulated Pex Pipe to be a lower cost, more efficient choice to connect to the outdoor wood boilers that are heating Americas homes.
