Dated: Sep 29, 2009

AD100 Auto key programmer The World Leaders in Key Programming Systems This is a piece of equipment you must have if you are an automotive locksmith, Car Repair shop, Car Accessories or even Car Dealer.

Product Name : AD100 Auto key programmer

Model NO: LRAD100

The World Leaders in Key Programming Systems

This is a piece of equipment you must have if you are an automotive locksmith, Car Repair shop, Car Accessories or even Car Dealer.

PRODUCT DESCRIPTION

The AD100 is an Advanced Serial Diagnostic system which has been designed and developed to offer the most advanced diagnostic capabilities.

The AD100 can be used as a hand held portable diagnostic system, and is equipped with 64MB of RAM which is used for the application data, and 4MB of Flash for the protocol handling system. In addition to this it has a RS232 interface connection for transferring application data from a PC and printing.

The unit has a 128x64 Dot Matrix Back Lit LCD TFT display along with membrane keypad.

The unit is capable of reading fault codes, clearing fault codes, displaying live data, performing special functions, and recording live data both statically and on the road.

The unit is powered from the vehicle battery, and connects to the serial diagnostic connector through a 25way D-Type cable system.

POWER CONNECTION

The unit is powered by the vehicles 12 volts battery which is connected to the diagnostic socket. If no power is available through the vehicle diagnostic socket then the adapter cable will have the vehicle battery connections.

VEHICLE CONNECTION

The master cable AD110 is used to connect the equipment to the various adapters available for the different vehicle connector types.

This system enables the equipment to be kept up to date with the various diagnostic connectors at a reasonable cost.

LCD BACKLIGHT

The LCD BACKLIGHT is automatically switched on when the unit has power. This cannot be switched off or adjusted. If the unit is not used for a period of time the LCD backlight will automatically switch off, and as soon as any key is pressed it will switch back on again
