

Free International Calls to Bangladesh: Report at voipforbangladesh.blogspot.com

Rynga, the newest Betamax VoIP service provider offers free call to Bangladesh and Malaysia (Landline + Mobile), and to India, in just 1 US cent /min to mobile. Read a review by "VoIP for Bangladesh".

Sept. 30, 2009 - [PRLog](#) -- Can you believe it! - now you can call Bangladesh for FREE! using VoIP. For details please read the whole article on <http://voipforbangladesh.blogspot.com>.

Yes, there is a very good NEWS for you. Betamax and Delmont Sarl have launched another VoIP service called Rynga, the discount voip provider. Rynga, the newest VoIP service provider offering free calls to Bangladesh (Landline + Mobile). Among its free destinations, Malaysia (Landline + Mobile) is there as well. Also offering very low rate calls to India, is just 1 US cent per minute to Indian mobile and 1.5 US cents to call landlines. Since most people in India carry a mobile, the deal seems to be good for India as well.

Bangladesh - FREE (mobile & landline)

Malaysia - FREE (mobile & landline)

India - 0.018 USD/min* (landline) and 0.012 USD/min* (mobile) Nepal - 0.135 USD/min* (landline) and 0.153 USD/min* (mobile)

Sri Lanka - 0.067 USD/min* (landline) and 0.067 USD/min* (mobile)

(* Price is including VAT)

For making a free call to Bangladesh with Rynga voip service, you need to buy some credit from Rynga voip service provider. Once you register and buy credit, you will get 120 free days. On those 120 free days you can call to destinations included in their SuperDeal offer for FREE. Nothing will be deducted from your credit for those free destination calls until you are not violating their fair use policy. And the credit you have - can be used to call to paid destinations as well. If you cross the daily call limit to free destinations, the extra minutes talked will also be charged at the rate mentioned for those destinations (see the rate chart). You can use SIP to make calls from your iPhone, for details see the SIP settings of Rynga voip below of this post.

How to use Rynga

There are many ways to make calls with this service:

1) Rynga Softphone:

a) Download Rynga Softphone

b) Install it, and open an account with it.

c) Buy credit using your account, and there you go.. start calling to Bangladesh Landline and Mobile for free.

You can make call from PC-to-phone which is free. If you want to use phone-to-phone service, which is convenient for some people, you need to pay 5 Euro cents for each call in addition to the charge for call to the phone from which the call is originating. For example, if you are calling to Bangladesh from UK Mobile, you will have to pay nothing for Bangladesh side, you will pay for call to UK Mobile plus 5 cent for each call. Phone-to-phone call between two SuperDeal destinations (for example from Japan landline to Bangladesh Mobile or Landline) will cost only 5 cent. Among the SuperDeal destinations of Rynga are

Land line only

Australia
Austria
Belgium
Bulgaria
Czech Republic
Denmark
Finland
France
Germany
Greece
Ireland
Japan
Netherlands
New Zealand
Spain
South Africa
Sweden
Switzerland
Taiwan
UK

Land line and Mobile

Bangladesh
Canada
China
Hong Kong
Italy
Malaysia
Poland
Portugal
Singapore
Thailand
USA

If you are calling from your phone to Bangladesh (but the call must be originated using their website or from the Rynga softphone) from any of the free destinations, you can save a lot by using this service.

2) Rynga SIP Service:

Rynga also offers its VOIP services via SIP. Check following Rynga SIP settings:

SIP port : 5060
Registrar : sip.rynga.com
Proxy server : sip.rynga.com
Outbound proxy server : leave empty
Account name : your rynga username
Password : your rynga password

Display name/number : your rynga username or voipnumber
Stunserver (option) : stun.rynga.com

Once you have an account, you can use your SIP software (or hardware) for making calls using your Rynga account.

If you want to call from iPhone using SIP you can use iPhone Web Applications like Fring, Truphone or you can buy SIP applications like iSIP or iCall. I have used iSIP and I am satisfied with it so far.

Rynga Supported Codecs:

G.711 (64 kbps)
G.726 (32 kbps)
G.729 (8 kbps)
G.723 (5.3 & 6.3 kbps)
GSMFR (13.2 kbps)

3) Rynga Local Access Numbers:

Rynga offers local access numbers in several countries through which you can place calls. This method is similar to Phone to Phone Calls.

Overall Rynga Betamax VoIP service is great. Check out there site and sign up to make free calls to Bangladesh and other countries. Do give your feedback about Rynga Voip at our comment section.

###
