

Forex Rebellion Betatesting Results

By Hassam

Dated: Oct 05, 2009

Before launching Forex Rebellion, its creators felt it was a crucial thing to have independent beta-testers check it out...in fact, 4 of them. These people were given the system to trade LIVE...with real money and judge its performance.

One of the most robust and profitable Forex systems on the market is about to be released...Forex Rebellion. I have been following its launch but more importantly I have been following its efficiency and profitability. I want to share something very important with you today that I am sure you will appreciate. Before launching Forex Rebellion, its creators felt it was a crucial thing to have independent beta-testers check it out...in fact, 4 of them. These people were given the system to trade LIVE...with real money and judge its performance. Now...today you will be able to see their interview and hear what they had to say about the systems profitability, ease of use and uniqueness....and tomorrow I will show you a video of them placing live trades with the system, proving how accurate and easy to use it is.

And by the way, I have actually had the privilege to talk with one of the beta-testers over the phone. Amongst other stuff, I asked him what was the thing he most liked about Forex Rebellion...Hands down he said, its accuracy and ease of use. He also said that he never saw such an original system on the market and that made it so unique for him. And don't forget...tomorrow I will be sending you the video that proves how profitable and accurate this system is trading with real, live money accounts. You have probably read by now about Forex Rebellion...Forex Rebellion is launching soon and has been creating a lot of noise in the market (and for good reason!)

Now...as soon as I saw what was going on, I immediately asked its owner to tell me more about it...and to provide me with an evaluation copy. Anyway... after evaluating it, I must say that I encountered a Forex system that is not only profitable and accurate...but also very easy to use (and I mean it, VERY easy to use!). You will love what I got for you today...4 of the beta testers of the new Forex Rebellion system just talked about it for the first time. What they say is astounding and you absolutely must listen to the interview.

I really loved what these independent beta-testers had to say about Forex Rebellion...and yes, it further confirms what I thought about the system after reviewing it. But there is a bigger thing brewing...These beta-testers will SOON demonstrate the system trading LIVE....real money, real profits, real ease of use. How's that for being confident that this system works?

If one person tells you something, that is one thing, but when you have a group of traders who are so blown away by the power of this system that they will trade in front of you - that's another. Anyway...as soon as I get that new video I will send it to you. The excitement of these beta-testers is simply impressive...a real joy to finally hear people so happy about an FX system.
