One of the best posts on Extreme Steams Carpet Cleaning Blog is Tips on how to remove cosmetics. here is a gist of that post

Many cosmetics can be most successfully removed with products made specifically for their removal, i.e. fingernail polish remover. If such items are not available to you then you might try the following:

Apply a liquid detergent directly to the stain if the material is washable, or dampen the stain and rub synthetic detergent or soap into it until thick suds are formed. Repeat as many times as necessary. When the outline of the stain is gone, rinse thoroughly. Sometimes it helps to let the fabric dry between treatments.

Sponge nonwashable fabrics with cleaning fluid repeatedly until no more color can be removed

Extreme Steam hopes their blog will be a good reference for cleaning tips to people everywhere.
