

Caregiver Paging Pager System for Elderly

The completely wireless Two Pendant Paging System allows loved ones to get help just by pressing a button. With a 300 foot range the receiver unit will chime as soon as the button is pressed.

Oct. 15, 2009 - [PRLog](#) -- Now you are free to move around the house and can be notified when a need arises.

Assistive Technology Services announces the 2 Pendant Paging System.

The completely wireless Two Pendant Paging System allows loved ones to get help just by pressing a button.

With a 300 foot range the receiver unit will chime as soon as the button is pressed.

The Two Pendant Paging System is the best way to know if your loved one needs some help.

Sometimes you need to step away from your loved one or patient. This affordable paging system allows your loved one to call for you if they need help up to 300 feet away. That's enough for in, around and outside of most homes.

With a press of the button the receiver unit will chime and has a flashing light for a visual indicator.

So what does the Two Pendant Paging System do?

It has 2 pendants with easy to push buttons for your loved one. One can be worn while the other one can be placed on a wall.

The pendant (s) can be worn with a lanyard or attached to something (like a wall or table) to make it easier for your loved one to get to.

It has 1 receiver unit with flashing light indicator and chime that can be worn on your belt or pocket like a pager using the clip on the back.

The receiver unit also has a stand for setting on flat surfaces.

Is the receiver unit loud?

The answer is yes, the volume is not adjustable but it is very loud. You can chose from a 30 second siren or a 3 second chime.

This system has channel buttons so if you need more call pendants you can purchase more than one unit and set the channel to be unique to each unit so there will be no overlap in paging.
