

Heating the Outdoors? FREE Home Energy Audit from A#1 AIR & Appliance Saves Dallas Homeowners Money.

A#1 AIR Now Providing FREE Home Energy Audits. This year there is a better way for Dallas and Fort Worth area homeowners to save money on their home heating costs: Energy Efficiency.

Oct. 27, 2009 - [PRLog](#) -- Energy Efficiency is the current buzzword on the national stage, and A #1 Air is the premier, local energy efficiency upgrade company. We help homeowners see where they can save money on heating, air conditioning, water heating consumption, and any other energy costs. Thereby achieving a home's maximum efficiency potential. The Federal Government is offering considerable financial incentives to help homeowners make the necessary energy efficiency upgrades to their homes. On February 17, 2009, The American Recovery and Reinvestment Act of 2009 was passed and made some significant changes to the energy efficiency tax credits. Through Dec 31, 2010 homeowners can receive a tax credit of up to \$1500 on qualifying energy upgrades.

"We truly want to see our customers keep as much of their money as possible," emphasizes James Green, owner of A #1 Air. "Our customers save money and energy while getting tax credits for making sensible improvements to their home, which adds value to their property. They also experience the comfort they want in their home without running up utility bills. "

One of the best ways to stem high home heating costs and to conserve energy is to make sure that all of the systems in a residence are operating at their highest possible efficiency.

A#1 Air performs several diagnostic tests to determine how effectively the heating and cooling systems are handling the needs of the home. These tests indicate how best to improve the efficiency of the home and help calculate the amount of incentives residents can expect to receive for completing the work on their homes.

In addition to home performance testing, A#1 Air, a licensed contractor and an Oncore Preferred Dealer, can readily make the necessary upgrades on residences. Homes of all ages can benefit from testing –we supply all homes with a report card that has specific tips and suggestions that will help cut utility costs, many of which are little or no investment to the homeowner.

A#1 Air can perform much of the recommended work and provides all of the necessary paperwork regarding incentives and tax credits. With the rise of energy costs, now is an especially opportune time to ensure the homes in the Dallas Texas metro area are running as efficiently as they are able.

A#1 Air is offering the Home System Performance Energy Audit for FREE to the first 50 Customers to schedule before November 30, 2009.

For more information on this topic, or to schedule an interview with the A#1 Home System Performance Audit Team, please call 972-242-4800 or email info@anumber1air.com

###

About A#1 Air & Appliance: A#1 Air & Appliance continues to grow as it closes in on its third decade of providing the Dallas / Fort Worth Metroplex with service excellence in all things Air Conditioning, Heating, and Appliance. A#1 has won numerous awards, including recognition as the number one Carrier residential replacement dealer for 2006, 2007 and 2008. A#1 Air & Appliance was the only recipient in Texas of the prestigious President's Award from Carrier for 2008 and one of only 63 dealers in the nation. A#1 Air has also been named Best of Carrollton in both 2008 & 2009.

A#1 Air & Appliance is truly family-owned and operated. The A#1 staff is comprised of many of the Green's family members and employees that are like family to James and Sherry. Most of their employees have been with them from 5-15 years.
