

## Private Practice Medical Data Backup and Restore Provider Makes New Hire

*By Central Data Storage*

*Dated: Nov 02, 2009*

*Central Data Storage is pleased to announce that Craig Condello has joined our organization as Director of Business Development.*

Central Data Storage is pleased to announce that Craig Condello has joined our organization as Director of Business Development. Condello brings years of experience from a managing leader standpoint, process improver and as a strong relationship builder.

Prior to joining CDS, Condello was a measurement services manager at National Research Corporation. Prior to his time at NRC, he served as manager of the global clinical study design team at MDS Pharma Services.

"We are very excited to have Craig Condello join our organization. Craig's ability to breakdown compliance law, educate perspective clients and build business awareness will certainly allow us to help our clients protect their critical business data through our offering," said President and CEO Ed Conklin. "Craig will be a great resource to our current staff and customers alike."

Central Data Storage, based out of Lincoln, Nebraska is a specialized national company providing online backup and recovery solutions dedicated to safeguarding the practice management data of dentists, medical practitioners and chiropractors.

Along with private practice affordability Central Data Storage has an array of benefits including in-house technical engineers to answer your toughest questions. In addition there's unlimited versioning of files, the highest grade encryption to meet HIPAA compliance, real-time "best in class" data recovery and daily email and a monthly report giving assurance after every successfully back up.

The company offers one-on-one support and consultation via its in-house support team, ensuring that every call receives personal attention.

"Professionals calling us will never be lost in a maze of meaningless recorded messages or buttons to push," Conklin said. "Plus in the event any data is lost, stolen or corrupted, our technical engineers are able to access archived patient information any time it's needed via our quick recovery process."
