Dated: Nov 05, 2009

The Windows Mobile 6.5 HTC HD2 has now been launched on O2, we take a closer look at the new Touch HD 2 and review this new phones features, design and technology.

The HTC HD2 has revolutionized the world of smart phones altogether. Power packed with great features and high on the style factor, the HTC HD2 is one cool mobile phone. This latest HTC device combines technology and looks to give you a great smart phone experience.

The style factor

The main highlight of the HTC HD2 is the 4.3 inch touch screen display. The capacitive touch screen has WVGA display and supports 65,000 colors. The screen has a resolution of 480x800 pixels. But the large display does not mean that this mobile phone is bulky or chunky. As a matter of fact, it is quite slender and sleek. It fits easily into the palm and the touch screen keyboard makes it easy to type text.

Performance and UI

The phone has unparalleled performance. It uses the Qualcomm Snapdragon QSD2850 1 GHz processor and works on the Windows Mobile 6.5.

The UI is user friendly and makes use of HTC's Sense User Interface. The capacitive touch screen means that you can zoom and resize websites, view Microsoft Office files, PDF documents and pictures easily with just a touch of a finger.

Windows Mobile and internet connectivity

The Windows Mobile OS gives the user several cool applications. Microsoft Exchange enables users to synch and manage several e-mail accounts in one go. The My Phone feature enables users to synch data between their handset and the internet. You can upload photos and videos easily onto the internet. You can also download music, videos, to download many more useful applications. Internet speed is quite good thanks to dual band UMTS with 7.2 Mbps HSDPA and 2 Mbps HSUPA. Pages load quite fast and IM facility is available. You can add widgets to social networking sites like Twitter and Facebook.

Expandable memory

The HD2 has an inbuilt memory of 512 MB. Although this seems quite small, remember that it can be expanded to 8 GB by using a microSD card. You can store a large number of contacts, information, music files, videos, images etc on the mobile.

A visual treat

This new HTC phone has a 5 mega pixel camera with a resolution of 2592 x 1944 pixels. Other features include geotagging, autofocus etc. Images are clear and crisp. You can also record videos on this phone. The media player in this phone runs files in the DiVX, XviD, WMV, MP4, H.264 and H.263 formats. The

music player supports AAC, AMR, M4A, MP3, MP4, QCP, WAV and WMA formats.

Weather and navigation features

An attractive feature of this mobile phone is that it gives you animated weather reports and it also comes with GPS. The optional car-kit permits the display to convert into a useful navigation system.

Contacts

One great feature of the HD2 is that you will get snapshots of conversations with your contacts, whether it is through text or Facebook or voice calls. This is a great way to stay updated and in touch.

Other great features

These include FM radio, vibrating alerts, calendar, memo, polyphonic ring tones, games, Wi-Fi connectivity, Bluetooth and so on.
