718-343-6600/516-317-5091....<http://www.WESELLBLINDS.com> ,this FREE UPGRADE will end on November 15th 2009

Free Lite-Rise UPGRADE no Charge for Cordless Blinds @ Superior Interiors Plus.

We do NOT Charge for Cordless Upgrade.(any Duette, Applause honeycomb shade)

The Season of Giving Fall Rebate Offers run between Sept. 25 and Dec. 15, 2009 and encompass manufacturers' mail-in rebates from \$25 to \$600 per product per window on Duette Architella honeycomb shades, Silhouette and Nantucket window shadings, Pirouette window shadings, Luminette and Park Lane Privacy Sheers, Skyline Gliding Window Panels, Vignette Modern Roman Shades, Duette Vertiglide honeycomb shades and Duette Vertiglide honeycomb shades with Duolite. Having no unit maximums increases the possibility of multiple purchases. Alustra Collection products from the applicable product lines also qualify for these rebates. Additionally, Hunter Douglas Gallery Dealers and Showcase Priority Dealers can offer free lifting system upgrades on select products.

Calculations, based on a conservative energy-savings methodology that was validated by the Rocky Mountain Institute, show that Duette Architella shades can save up to \$2.94 per square foot annually in energy costs and approximately 10 percent of an average household's carbon footprint. Of course, estimates will vary by region.

With its 180 color and design choices, Duette Architella offers an extensive interiors design palette. What's more, Architella shades offer a variety of lifting systems designed with child safety in mind. And, like most Hunter Douglas product offerings, Duette Architella shades have passed rigorous standards and test procedures and are GREENGUARD Indoor Air Certified® and also certified by GREENGUARD for Children & Schools(SM).

The Hunter Douglas Corporate Commitment

The Hunter Douglas commitment to energy conservation does not end at industry-leading product innovation. The company is an active member of the U.S. Green Building Council (USGBC), the National Fenestration Rating Council (NFRC) and an Energy Star Partner as well. Hunter Douglas, which has production facilities throughout the U.S. and Canada, has also implemented an aggressive plan to reduce its overall carbon emissions by 20 percent over a three-year period.

Philanthropic outreach includes financial support of the Arbor Day Foundation in its efforts to replant trees lost to fires and to preserve rapidly diminishing rainforest lands. Hunter Douglas also provides monies to the Acumen Fund -- an equity fund that invests in technologies that assist

millions of people in developing countries live safer and healthier lives while reducing their impact on the environment. Its activities include purifying drinking water and backing the commercialization of LED lighting products to replace polluting kerosene lamps.

"From products to processes to philanthropy, environmental consciousness is a core Hunter Douglas value," concluded Hopkins.

Between Sept. 25 and Nov. 16, 2009, The Season of Giving Child Safety Upgrades provide customers with a free upgrade to the exclusive LiteRise cordless lifting system on every purchase of Duette and Alustra Duette honeycomb shades, Applause honeycomb shades and Vignette Modern Roman Shades with the Tiered design option

The American Recovery and Reinvestment Act includes energy efficiency tax credits on select products for existing homes, including Windows and Doors, Insulation Materials & Systems, Roofs, HVAC, Water Heaters (non-solar) and Biomass Stoves. Most Duette Architella shades that are mounted completely inside the window frame over double-glazed windows can qualify under the insulation category. Specifically, qualifying Duette Architella shades are categorized as an "Eligible Building Envelope Component" and meet the requirements for the Non-business Energy Property under Internal Revenue Code Section 25C, as modified by Section 1121 of the American Recovery and Reinvestment Act of 2009.

Homeowners should check the Manufacturer's Certification Statement available at hunterdouglas.com/taxcredit for a list of qualifying Architella products and restrictions and also consult their tax advisor to determine whether they are eligible for this federal tax credit. Homeowners will need to keep a copy of their receipt and the Manufacturer's Certification Statement for their records.

Duette® Architella® Shades: Energy Savings Made Beautiful
Introduced in 2006, Duette Architella shades have insulating R-values as high as 7.86 and solar heat gain coefficients as low as 0.15. Their patented honeycomb-within-a-honeycomb design forms more air pockets than traditional honeycomb shades and reduces heat transfer at the window by up to 50 percent when the shades are properly installed -- more than doubling the energy efficiency of the window and helping to lower heating and cooling costs.
