Million Euro Home Page - Be a part of this project!

The Million Euro Homepage – 24 year old student will be a millionaire ?

A 24 year old student trying to earn one million euro by selling pixels

5. november 2009:

Jonas Uvestal is a 24 year old student and entrepreneur is the owner of “The Million Euro Homepage”. The idea is simple, he offers 1 million pixels for a price of 1 euro each. Once the pixels are bought they can be used to place a banner/image/ad on the purchased pixels. Jonas says: “The pixels you buy will be displayed on the homepage permanently. The homepage will not change anything without permission of the customer. The site will be online for 5 years guaranteed (at least until 1st Januar 2014), however the aim is to keep the site online forever”. 10 days after the start of this website 800 pixels got sold and the daily average of unique visitors is above 400. If the site goes on like that there won't be a problem to reach the goal of 1 million sold pixels.

It will be exciting to watch how the pixel sells are going over the next months and who will buy what amount of pixels and where the customers place them
