A while ago I was contacted by the Forex Gurus from the Forex Twister team about a new superior A.I. that they have been developing for quite a while. They sounded very excited about this project and told me that, in all their 30+ years combined in Forex trading, they had never seen a FULLY automated robot that produced results like the ones they managed to achieve. And let me tell you, after taking a pick at this thing -- and having tried so many myself -- I did have to agree that their robot truly is a **revolutionary** solution for the average trader with a 9-5 job and little money to start with...

If you have tried other Forex robots in the past that have claimed to make "GAZILLIONS" and failed time and time again, it is mainly for one reason: Those are **unrealistic** results, simply because to make such amount they would need to be pushed to the limit in such risky way that it is NEVER going to work out in the long run on a REAL account!

Trading is a long term investing business. It's not a hit and run job. To be seriously involved in trading forex market you need a system that is safe and profitable in BOTH short term and long term trading. And that's exactly what Forex Twister is designed to do. This is where all the other robots I have tried before FAILED – and this is why Forex Twister WILL skyrocket your REAL Forex account...Just take a look at this FREE video that will give undisputable PROOF of what I mean!

Forex Twister was also designed for maximum profit AND maximum safety. Because Forex trading can be very risky, IF you don't know what you are doing and why you are doing it. Most Forex robots out there take into account high risk trading to attract buyers. That's right, they are after "buyers".. not traders. It doesn't matter to them what your real trading results would be. As long as you bought their product, it's fine with them, but this is not the case with Forex Twister and the team behind it. And now, here is the great news for YOU...

These guys just had enough of all the "hype" and the "lies" around forex robots and decided to come out of the shadow to **proof** that a team of professional traders and programmers can indeed develop the
